Matheus D. Krause

krause.d.matheus@gmail.com | +1 (515) 708-3842 | about.me ⬈

Plant breeding is a fascinating and important science to ensure high quality and sufficient quantities of food are available for our growing population. This endeavor requires motivated scientists. In this scenario, my research interests comprise biometry, biostatistics, quantitative and statistical genetics. I am also excited about the future of agriculture: I believe we must develop approaches to mitigate harmful environmental impacts and improve efficiency at all levels of the value chain.

EDUCATION

Ph.D. Candidate in Plant Breeding with Statistics minor (Exp. Spring 2023)
IOWA STATE UNIVERSITY - AMES, IOWA, USA | MAJOR PROFESSOR: DR. WILLIAM D. BEAVIS
Projects: Unraveling genotype by environment variation to identify mega-environments with genetic and non-genetic factors.
Development of estimation methods to obtain unbiased realized rate of genetic gain using routine field trials.

M.S in Plant Breeding and Genetics (2018)
UNIVERSITY OF SÃO PAULO - PIRACICABA, SP, BRAZIL | MAJOR PROFESSOR: DR. ANTONIO A. F. GARCIA
Title: Boosting predictive ability of maize hybrids via genotype by environment interaction under multivariate GBLUP models.

B.A in Agronomy (2015)
LONDRINA STATE UNIVERSITY - LONDRINA, PR, BRAZIL | MAJOR PROFESSOR: DR. JOSUÉ M. FERREIRA
Title: Combining ability of maize inbred lines S_9 derived from ST15 and S709 synthetics.

Exchange Student in Plant Breeding & Engineering for Mediterranean and Tropical Areas (2013/14)
MONTPELLIER SUPAGRO - MONTPELLIER, FRANCE | UNDER DRS. RICARDO RALISCH AND JEAN-LUC REGNARD
Title: Connaissance des Géniteurs Maïs (Confidential to Limagrain Europe and Montpellier SupAGro).

RESEARCH EXPERIENCE

BILL BEAVIS'S G.F. SPRAGUE QUANTITATIVE GENETICS GROUP | GRADUATE RESEARCH ASSISTANT
May 2018 - Present | Department of Agronomy, Iowa State University
- Develop a metric to estimate realized genetic gains on an annual basis using soybean routine field trials.
- Unraveling genotype by environment variation to identify mega-environments with genetic and non-genetic factors.
- Develop software to correct partially informative markers from backcross one derived (BC1) double-haploid (DH) lines.
- Genome-wise association for complex binary (case-control) and continuous traits.
- Consult several graduate students (+20) with plant breeding data analysis and R programming.

STATISTICAL GENETICS LAB | GRADUATE RESEARCH ASSISTANT
March 2016 - March 2018 | Department of Genetics, University of São Paulo
- Apply multivariate linear mixed models to predict yield performance of single-cross maize hybrids based on information from genomics and genotype by environment interaction.

TROPICAL BREEDING & GENETICS | INTERN
Aug 2015 - Nov 2015 | Soybean Breeding
- Plant phenotyping for soybean cyst nematode, *Phytophthora sojae* and *Sclerotinia sclerotiorum*, generation advancement in greenhouses, crossing blocks, seed packing, and general activities in the biotechnology laboratory.

LABORATORY OF MAIZE BREEDING | UNDERGRADUATE RESEARCH ASSISTANT
Jun 2010 - Jun 2015 | Department of Biology, Londrina State University
- Development and evaluation of inbred lines for common and sweet corn via classical and DH techniques.
- Evaluation and development of single-cross hybrids and synthetic populations for both common and sweet corn.
- Participation in an extension project to teach farmers how to produce their seeds of synthetic populations.

LIMAGRAIN EUROPE | INTERN
March 2014 - Jun 2014 | Department of Seed Production to Research
- Data mining to support early decision-making on the profitability of female maize inbred lines (seed production).
- Stability analysis to identify stable check cultivars to be used in seed production.

+ 25 Abstracts and 40 technical publications in agricultural newspapers.

ADDITIONAL INFORMATION

TEACHING & SEMINAR
- **2020/22** Lecture on *AlphaSimR* in Agron 523 (Molecular P. Breed., graduate-level course, Dr. Lübberstedt).
- **2022/23** Invited to speak in the "Big Data: Manage your data before your data kills you" session at the Plant and Animal Genome Conference Plant and Animal Genome Conference 2022/2023.
- **2017** Instructor of R programming course at the University of São Paulo.

PROGRAMMING SKILLS
Advanced R programming language, basic Python and Julia, Linux, LaTeX • Developer of the R package SoyURT ⤤

LANGUAGE
Portuguese (native), English, basic French

LEADERSHIP
- **2020-2021** Committee member in the 7th and 8th annual R. F. Baker Plant Breeding Symposium at Iowa State University.
- **2011-2013** Student representative of Agronomy in the Regional Council of Engineering and Agronomy.

AWARDS
C. R. Weber for Excellence in Plant Breeding (Spring 2022) • Bayer Travel (2020) & Mentoring Program (2022).

MATHEUS ENJOYS...
Spending time with his family and friends • Reading • Fishing • Being outdoors • Playing guitar • Riding motorcycle.
